

Full Rehearsal — 09-16-2026

Private printable checklist for the ACC Tournament Desk device rehearsal

Purpose: prove the complete Main, Consy, Digital/Paper team, verification, recovery, financial, and results workflow before the October 3 pilot. Use this rehearsal only; do not alter Pilot Tournament or October 3 Pilot Tournament.

Before you begin

- [] Have six blank paper scorecards, one camera phone, and a small test CSV. Use only fictional ACC numbers RH-01 through RH-06 and test cash/check entries.
- [] Use three tables with four seats each. Confirm that the tournament draft is **Full Rehearsal — 09-16-2026**.
- [] Every device must sign in and open the rehearsal before either outage test. Do not put sign-in links, email addresses, or credentials in this runbook or in a screenshot.
- [] Do not clear app data until each device reports an empty local queue and the server has acknowledged every locally initiated score operation.

People, devices, and assigned test roles

Person	App role	Device	Singles	Team rehearsal assignment
Daron	Owner · primary director · player	PC laptop	Digital	Digital Team Alpha captain/scorer with Luke
Maryn	Co-director · player	Samsung phone (Wi-Fi/data)	Digital	Digital Team Bravo captain with Gabe
Gabe	Cross-checker · player	Wi-Fi iPad	Digital	Digital Team Bravo designated scorer; offline-test device
Ian	Player	Wi-Fi Samsung phone	Paper	Paper Team Charlie with Shonni
Shonni	Cross-checker · player	Wi-Fi MacBook	Paper	Paper Team Charlie with Ian
Luke	Player	Wi-Fi MacBook	Paper	Digital Team Alpha partner with Daron
Alice	Co-director observer · non-player	Director choice	N/A	Full rehearsal access; observe every workflow without active test duties

Alice is a seventh, non-playing co-director observer and is not one of the six fictional test identities. Add her as co-director after she signs in; she may inspect the rehearsal but should not replace an assigned test actor. Team scorecard choice is separate from a person's Singles choice. Luke is Paper for Singles and Digital with Team Alpha. For the Paper Team Practice Satellite, Daron/Luke and Maryn/Gabe re-form as Paper teams.

Four rehearsal events

Event	Configuration	Pass focus
Main Event	Standard Singles · 12 games · two Q Pools	Automatic Main MRP; verified standings and qualifiers
Consolation	Standard Singles · 7 games · Main non-qualifiers	Automatic Consy MRP; independent event lifecycle
Canadian Doubles Satellite	3 games · Digital Team Alpha, Digital Team Bravo, Paper Team Charlie	Digital/Digital and Digital/Paper team scoring; MRP not applicable
Paper Team Practice Satellite	3 games · Paper teams Daron/Luke and Maryn/Gabe	Paper/Paper team scoring; MRP not applicable

MRP source boundary

Main and Consolation calculations use the currently published ACC schedules: **MainMRPs2017ver2.pdf** and **ConsMRPs2017ver2.pdf**, each marked effective **August 1, 2016**. The app records source version **acc-published-mrp-2016-08-01** and the effective date in the calculation/export. Every qualifier needs a recorded playoff exit round. Satellite reports must show **MRPs: Not applicable**; they do not qualify anyone for Main or Consy.

Run the rehearsal — setup and intake

- [] **1.** Sign in as Daron. In **Your tournaments**, open Full Rehearsal — 09-16-2026. Confirm Daron is primary director; do not open a Pilot Tournament.
- [] **2.** Use **Set Up Tournament** to enter name, date, city/location, cash/check payment methods, fees, notes, Main, Consy, Canadian Doubles Satellite, and Paper Team Practice Satellite. Add two Q Pools to Main and retain notes as needed.
- [] **3.** Create the rehearsal registration link and QR code. Capture a screenshot of the safe registration landing page only (no credentials or magic links).
- [] **4.** Test roster intake: Maryn uses the QR code; Gabe and Ian use the registration URL; import Shonni and Luke with the test CSV; add Daron as a manual walk-in/player. Attempt one duplicate registration and verify the director rejects it.
- [] **5.** Review/approve claims and promote the six fictional identities to the roster. Have every account sign in on its assigned device. Complete the required two-official player-account activation using Daron and Maryn.
- [] **6.** Assign Gabe and Shonni as cross-checkers. Verify a player cannot self-assign or use a cross-checker action outside the rehearsal.
- [] **7.** Record test cash/check intentions and director receipts. Include one partial payment, a correction/void, and a corrected replacement receipt. Verify payment status is separate from check-in and scoring authorization.
- [] **8.** Check in all six players. Close registration and prove another signup is rejected. Record the result before continuing.
- [] **9.** Publish seating for three tables × four seats. On every device, verify the own starting Table/Seat and permanent Verification ID. Search by a name and a test ACC number; print the paper-card preparation list.
- [] **10.** Create the three teams; complete partner claims; set Alpha and Bravo Digital and Charlie Paper; set Gabe as Bravo's designated digital scorer. Verify Paper/Paper practice teams can be created separately without changing the prior team identities.
- [] **11.** Enroll entries in their events and publish schedules. Try invalid capacity, duplicate participant, and missing-opponent changes and verify rejection. Start **Main** and **Canadian Doubles Satellite** separately; confirm starting one event does not start the others.

Run the rehearsal — scoring and verification

- [] **12.** Singles Digital/Digital: Maryn vs Gabe. Record matching independent submissions and two eligible confirmations. Verify score becomes authoritative only after the required independent evidence.
- [] **13.** Singles Digital/Paper: Daron vs Ian. Use the paper card and the digital entry/cross-check workflow. Capture the pending state and final verified state.
- [] **14.** Singles Paper/Paper: Shonni vs Luke. Record independent official paper evidence and complete the cross-check.
- [] **15.** Across Singles, test a skunk, a deliberately mismatched result, self-confirmation rejection, an audited correction, and that pending/mismatched scores stay out of standings.
- [] **16.** Team Digital/Digital: Team Alpha vs Team Bravo. Confirm all four members display, permanent team Verification IDs persist, reciprocal cards agree, and a scorer cannot confirm their own entry.
- [] **17.** Team Digital/Paper: a Digital team vs Paper Team Charlie. Test paper transcription/review, mismatch, correction, and independent completion.

[] **18. Team Paper/Paper:** use the Paper Team Practice Satellite. Confirm separate paper-team records, cross-checking, and no MRP effect.

Run the rehearsal — outage and recovery

[] **19. Single-device outage (Gabe's iPad):** disconnect Wi-Fi; enter a result; reload; reconnect; confirm exactly one synchronized entry and no duplicate. Screenshot the stored-local/pending indication and the recovered receipt.

[] **20. Whole-venue outage:** first open the active games on every device. Disable mobile data on Maryn's phone. Remove router/hotspot internet (or otherwise disconnect the shared Wi-Fi's internet). Record separate digital and paper results; verify each digital device reports local storage awaiting synchronization.

[] **21.** Restore internet. Confirm queued entries synchronize once, no entries are missing or duplicated, and reconstruction can use an opposing device or paper card. Confirm games become verified only after independent submissions/confirmations arrive.

[] **22.** If one simulated phone becomes unavailable, use the recovery workspace and independent evidence to reconstruct only the affected result; record the audit receipt and preserve the original device record.

Run the rehearsal — results, pools, finance, and reports

[] **23.** Complete the Main schedule with verified results. Inspect standings, qualifiers in qualifying-rank order, the High Non-Qualifier, playoff entries, recorded playoff exit rounds, and automatic Main MRP results.

[] **24.** Enroll Main non-qualifiers in Consy, publish the Consy schedule, Start Play, complete result/qualification/playoff data, and verify automatic Consy MRPs are separately calculated.

[] **25.** Complete Satellite placements, payouts, optional special-hand evidence, and cross-check evidence for cashing cards. Confirm both Satellites state MRP not applicable and have no Main/Consy qualification effect.

[] **26.** Create zero through six uniquely named Side Pools. Verify a seventh pool and a duplicate normalized name are rejected. Test elections, cash/check receipts, a correction, a void, payouts, exact-cent reconciliation, CSV, event PDF, and combined PDF.

[] **27.** Produce the post-event reports: verified standings, qualifier list and High Non-Qualifier, playoff results, automatic Main/Consy MRP source evidence, Satellite no-MRP report, Side Pool report, financial reconciliation, and director export. Review the totals against the entered test data.

[] **28.** Save screenshots of each pass/fail state, offline queue, recovery result, and any defect. Record failures precisely; do not hide a failed scenario by retrying without noting it.

Final pass checklist

[] QR, URL, CSV, manual walk-in, duplicate-registration, account activation, cross-checker assignment, and role boundaries passed.

[] Check-in, registration closure, seating, name/ACC-number lookup, paper-card list, event enrollment, schedule publication, and independent Start Play passed.

[] Digital/Digital, Digital/Paper, and Paper/Paper Singles plus supported team paths passed; self-review is denied; two independent submissions plus two confirmations are required before verification.

[] Skunk, mismatch, correction, audit history, pending-score standings exclusion, single-device outage, venue-wide outage, reload, exact-once sync, and recovery evidence passed.

[] Main/Consy MRP source-versioned calculation, Satellite no-MRP enforcement, qualifier ordering, High Non-Qualifier placement, playoffs distinct from qualifying rank, financial/Side Pool conservation, CSV/PDF, and director export passed.

[] All device queues are empty and acknowledged before any local app data is cleared. Record the final pass/fail decision and every defect before leaving the rehearsal.
